EDUCATION

- The University of Sheffield** Sheffield, UK
MSc. Advanced Computer Science - Machine Learning & AI; Grade: 2:1
Sept 2023 - Sept 2024
- Arka Jain University** Jharkhand, India
Bachelor of Computer Applications - Data Science; GPA: 9.4/10
Aug 2019 - June 2022

TECHNICAL SKILLS

- Frontend:** React, Next.js, TypeScript, JavaScript, Redux, HTML5, CSS3, Tailwind CSS
- Backend:** Node.js, Express.js, C# .NET (MVC), RESTful APIs, ASP.NET Core
- AI/ML:** Python, PyTorch, TensorFlow, Scikit-learn, OpenCV, NLTK, SpaCy
- Databases:** MSSQL, PostgreSQL, MongoDB, MySQL
- DevOps:** Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, AWS, Terraform
- Tools:** Git, Jira, Confluence, Streamlit, Agile/Scrum

PROFESSIONAL EXPERIENCE

- Accenture (UOB Bank)** Kuala Lumpur, Malaysia
Senior Software Engineer
Aug 2025 - Present
 - Lead frontend development team using **React (v16-19), TypeScript, and Redux**, building reusable UI libraries and handling build tasks while supporting backend development with **C# .NET MVC** for enterprise banking applications
 - Architect scalable **RESTful APIs** and design API changes with **MSSQL**, utilizing **LINQ** optimization to reduce API response times by 60%, improving system performance for millions of customers
 - Own end-to-end **CI/CD pipeline using Jenkins and Bitbucket**, ensuring automated builds and zero-downtime releases for mission-critical banking systems
 - Mentor junior engineers and colleagues on system design and functional alignment, manage **Jira** defect dashboards, and work closely with delivery managers and clients to ensure alignment on development priorities
- Wipro Technologies** Coimbatore, India
Software Engineer
Jul 2022 - Aug 2023
 - Developed full-stack applications using **React (TypeScript), Node.js, and Express**, building RESTful APIs handling 10K+ daily transactions with 99.9% uptime
 - Managed **CI/CD pipelines using Jenkins and GitHub Actions**, automating deployments across environments on **AWS (EC2, S3, Lambda)** with Docker containerization
 - Built **Python**-based data pipelines and ML inference services, implementing Kubernetes orchestration and achieving 40% faster deployment cycles
- Onlei Technologies** Remote
Data Science Intern
Dec 2022 - Jun 2023
 - Built ML models using **Python, PyTorch, TensorFlow, and Scikit-learn**, achieving 30% improvement in predictive accuracy with NLP techniques
 - Developed interactive dashboards using **Streamlit** and automated data preprocessing pipelines, reducing model training time by 25%

KEY PROJECTS

- YouTube Analytics Platform with AI Sentiment Analysis:** Full-stack application using **Next.js/React (TypeScript)** and **Node.js/Express** with Python-based NLP for real-time comment sentiment analysis. **Tech:** Next.js, TypeScript, Node.js, Python, NLP, YouTube API
- ePanda E-Waste Recycling Platform:** Led full-stack development with **Node.js/Express** backend, MongoDB, OAuth 2.0, payment gateway integration, and 80% test coverage. **Tech:** Node.js, Express, MongoDB, React, Jest, GCP
- Twitter Sentiment Analysis Engine:** Processed 1.6M tweets using **Python, TensorFlow, and NLTK**, achieving 80% accuracy with visualization dashboards. **Tech:** Python, TensorFlow, NLTK, Pandas, XGBoost
- Real-Time Face Mask Detection:** Computer vision system using **Python, OpenCV, and Keras** with Streamlit dashboard for compliance monitoring. **Tech:** Python, OpenCV, Keras, Streamlit

CERTIFICATIONS & INTERESTS

- Certifications:** IBM Full Stack Developer, IBM Introduction to Software Engineering, IBM Cloud Computing
- Interests:** AI/ML research, Guitarist, Vocalist, Gaming, Cooking, Sports
